PROFESSIONAL SUMMARY

- **Full Stack Developer** with extensive experience in architecting and developing complex **Angular-based SaaS** applications.
- **Proficient in Frontend Technologies** including **Angular, HTML, CSS, and JavaScript**, ensuring pixel-perfect implementation of high-fidelity designs.
- **Skilled in Backend Development** using **Node.js, Go Lang, Java, ASP .Net, and C#**, with a strong focus on creating scalable and maintainable solutions.
- **Strong UX Skills** and ability to transform high-fidelity **Figma** designs into responsive, user-friendly interfaces.

SKILLS

- **Frontend:** Angular (1.x, 2+), HTML, CSS, SCSS, JavaScript, Swagger, Backbone.js, jQuery
- **Backend:** Node.js, Go Lang, Java, ASP .Net, C#, VB.Net
- **Database:** MySQL, MongoDB, Cassandra, Couchbase

EXPERIENCE

Senior Member of technical Staff
[Cohesity](#)

May 2019 - Present
Pune, India

- Spearheaded the development of a Universal Data Adapters framework, drastically reducing adapter onboarding time from **6 months to a few weeks**.
- Successfully onboarded **SAP HANA, MySQL, MariaDB, and CockroachDB** adapters in record time.
- Key contributor to the development and maintenance of the frontend stack for various adapters including Salesforce, Cassandra, Couchbase, MongoDB, and Office 365, using **Angular 14+**.
- Engineered RESTful API endpoints with **Go Lang**, enhancing client-server data transfer efficiency.
- Authored API documentation in **Swagger V2.0**, facilitating the creation of consistent data models in **TypeScript and Go Lang**.
- Delivered a full-stack application utilizing **Go Lang and Angular**, enabling seamless user interaction with data security and management systems.

Fullstack developer
[Imanis Data](#)

Sep 2017 - May 2019
Pune, India

- Modernized UI projects from **Backbone.js/Java** to **Angular/Go Lang**.
- Played a pivotal role in the development of REST servers in **Java** and single-page applications in **Backbone.js**.

Senior Software Developer
[Altimetrik](#)

Aug 2016 - Sep 2017
Pune, India

- Developed the frontend stack for MasterPass wallet (**MasterCard**) using **Angular.js**.
- Key developer for **phoenix-core** components, utilized across multiple wallets.
- Built core frameworks for custom wallets and implemented robust security measures such as **CSRF** attack prevention and **XFS** with **Nonce tokens**.

Senior Software Developer
[Persistent Systems](#)

Oct 2015 - Aug 2016
Nagpur, India

- Developed the frontend stack for EngageMD using **AngularJS**.

- Led the modernization of EngageMD from **PHP/jQuery** to a single-page application with **AngularJS 1.x**.
- Created modules to manage and track patient journeys, significantly boosting conversion rates and practice revenue.
- Developed a versatile **AngularJS** service using **prototype inheritance** to manage all **AJAX calls** within the application, which was subsequently adopted by other projects at Persistent Systems.

Software Developer

Apr 2013 - Oct 2015

E-Forum Systems Pvt Limited

Nagpur, India

- Developed a full-stack solution for the Payroll Budgeting System module in PowerPlan product (ERP) using **ASP .Net, jQuery, AngularJS, and C#**.
- Created PowerLink service utility for data transfer between text/CSV files and **SQL Server**.
- Contributed to the modernization of legacy desktop software from **VB .Net** to a web application using **ASP .Net, jQuery, and C#**, later advancing to a single-page architecture with **AngularJS and Bootstrap**.

EDUCATION

Bachelor of Computer Science, RTMNU University

2008-2012
